Santa Barbara Vision Care

2019 was an incredibly notable year for SEE’s Santa Barbara Vision Care Program! With the help of our generous SBVC volunteers, our local program was able to significantly expand its annual impact. Not only did the program increase its number of patients served by 75% from 2018, but we extended its presence to Ventura County, and partnered with the Santa Barbara and Goleta Union School Districts. Because of these efforts made in 2019, the services provided by our SBVC program will be more accessible than ever before, allowing us to continuously grow the number of patients we are able to reach. Thank you to each and every one of our SBVC partners and volunteers for making this growth possible.
